Description

This course focuses on the development of early modern metaphysics and epistemology through the works of René Descartes (1596-1650), Benedict de Spinoza (1632-1677), Gottfried Wilhelm Leibniz (1646-1716), John Locke (1632-1704), George Berkeley (1685-1753), and David Hume (1711-1776). The early modern period is characterized by a turn away from the doctrines of Aristotle (384-322 BCE), as incorporated in the theological framework articulated by medieval thinkers such as Thomas Aquinas (1225-1274), and toward a new way of looking at the world that is compatible with the mathematized conception of nature advanced by Galileo Galilei (1564-1642), Isaac Newton (1643-1727) and others. It is common to think of the main figures of this period as divided into two camps: rationalists (Descartes, Spinoza and Leibniz), for whom some ideas are innate and reason by itself can discover fundamental truths about reality, and empiricists (Locke, Berkeley, and Hume), for whom there are no innate ideas and all significant knowledge is founded on sense experience. But the interplay between these six philosophers reveals a more complex story, one in which the rationalist/empiricist division is only one of many. We will see, for example, that Leibniz is sympathetic to Aristotle in ways that Descartes is not, that the main thesis of Locke's empiricism derives from Aristotle, that Berkeley's view of the natural world is arguably more similar to Leibniz's than to anyone else's, and that all the figures other than Hume are rationalists at least in believing that unaided reason is capable of demonstrating the existence of God. Understanding the evolution of metaphysics and epistemology in the early modern period is critical for understanding the views of Immanuel Kant, whose philosophy is a focus of Philosophy 112.

Prerequisites

Philosophy 111 is the second in the three-course history of philosophy sequence required of all Philosophy majors. It is assumed that you have already taken Philosophy 110.

**Important Information**

- Regular attendance and completion of the required reading ahead of lectures are critical. Engagement with the course presupposes that you have done the assigned reading and are prepared to discuss it in class.

- Paper extensions will only be given to those who present evidence of a valid excuse in a timely manner. Note that computer or printer failure does **not** usually constitute a valid excuse, so be sure to take all necessary precautions to safeguard your work (backup, backup, backup!). If at any time you believe you have a legitimate claim to an extension or make-up, bring it to my attention as soon as possible (e.g., if you are going to be out of town for a legitimate purpose, such as a university-sponsored concert performance, athletic event, conference, or the equivalent). Unexcused late papers will be penalized one +/- letter grade per day.

- If accommodations are needed for a disability or for religious reasons, please discuss the matter with me as soon as possible.

- Students should familiarize themselves with the UCSD Policy on Integrity of Scholarship: http://students.ucsd.edu/academics/academic-integrity/policy.html. There is a zero-tolerance policy on plagiarism in this class. Anyone who is found to plagiarize work will receive an automatic F for the course. Additional disciplinary penalties may be assigned by the UCSD administration. Receipt of this syllabus constitutes an acknowledgement that you are responsible for understanding and acting in accordance with UCSD guidelines on academic integrity.
