PHIL 210: GREEK PHILOSOPHY SEMINAR

ARISTOTLE'S PSYCHOLOGY AND COGNITIVE SCIENCE:

The *De anima* and *Parva naturalia*

Wednesdays 4-7pm, Philosophy Department Seminar Room

Monte Johnson (monte@ucsd.edu)

Course Description: This course will offer an opportunity to read the entirety of Aristotle's main work of psychology and cognitive science, *Peri psuchês* (conventionally translated *De anima* or "On the Soul"), and to consider its place in Aristotle's philosophy, including its theoretical and practical aspects. Readings from the smaller works on cognitive science and physiology (called the *Parva naturalia*) will be recommended. Each seminar will focus discussion on a part of the *De anima* and its relationship to the recommended readings and topics of interest to the students. Students will have an opportunity to research and discuss Aristotle's psychology as it relates to their own research interests.

Texts: See bibliography attached below; note recommended items in **bold**. Recommended for purchase:

- *The Complete Works of Aristotle: The revised Oxford Translation*, ed. J. Barnes. 2 vols. Princeton, 1984.
- *Aristotle: De anima*. Translated with an introduction and commentary by Christopher Shields. Oxford, 2016.

Evaluation will be based upon the following.

(1) Attendance and Participation; All participants are expected to be present at all meetings of the seminar with copies of the texts or translations to be discussed, prepared with questions or comments on the texts. Registered students will be required to write and post a 1000-word commentary on one of the assigned readings, due at the beginning of the next meeting, for any absence.

(2) Presentation and Handout; Students will be randomly assigned slots during weeks 7-10 in which to give presentations and lead discussions. Each student will lead a discussion of the relationship between Aristotle's psychology and some other part of his philosophy, such as his logic, physics, or ethics, based on the student's own interests. For this purpose, the student will choose, in consultation with the Professor, primary texts (texts attributed to Aristotle) to be distributed to the seminar one week in advance of the assigned presentation. The student will then prepare a handout and give a brief outline and overview of these texts, and will lead a discussion of the texts and their relationship to *De anima*.

For example, a student interested in Aristotle's ethics, or politics, or aesthetics could choose a book from *Nicomachean Ethics*, *Politics*, or the *Poetics*. More specifically, a student were interested in Aristotle's theory of weakness of will, or theory of emotions, could choose *Nicomachean Ethics* VII, or *Rhetoric* II.

(3) Research paper: A 4000-8000-word research essay which engages at least two primary sources (texts attributed to Aristotle) and two secondary sources (determined in consultation with the Professor) will be due by 5pm on Wednesday of week 11. A provisional indication of topic and proposed bibliography will be due week 5. The paper may adjudicate between disputed readings of a specific passage in Aristotle, or between interpretations of Aristotle's theories, or compare Aristotle's views with other historical or contemporary views of interest to the student.

1.1. The Prussian Academy Edition of Bekker.

Aristotelis Opera (Aristotelis Opera ex recensione Immanuelis Bekkeri edidit Academia Regia Borussica accedunt fragmenta scholia index aristotelicus). Ed. I. Bekker. 5 vols. Berlin.

This work is the basis of modern scholarship on Aristotle and establishes the standard pagination.

- 1.1.1-2. Volumes I-II. Immanuel Bekker's text of the Aristotle Corpus (1831). All subsequent editions and translations and commentaries on Aristotle use the system of page references instituted by Bekker: these numbers are called "Bekker numbers". Notice that this does not include the *Constitution of the Athenians* (because the papyrus of which was discovered after Bekker's edition) or any fragments (for which see 1.1.3, below).
- 1.1.3. Volume III. A collection of fragments from lost works collected and edited by V. Rose (1886). This has now been superseded by the expanded edition of O. Gigon (1987).
- 1.1.4. Volume IV. A collection of "scholia" or scholarly notes found in commentaries, collected and edited by I. Bekker (1836). This work is supplemented by the Commentaria in Aristotelem Graeca (23 vols, 1883-1903), parts of which are being translated in The Ancient Commentators on Aristotle (ed. R. Sorabji, London). (See section 6, below.)
