

Course Information

“Some people would rather die than think. And they do.” – Bertrand Russell

Description

The course focuses on ethical arguments and how they relate to contemporary issues, including questions about oppression, abortion, and animal rights.

You will learn what many talented and well-respected philosophers have to say about these questions, but the class is designed to get you *doing* philosophy, not just learning about it. I want to get you asking important questions, reasoning clearly and capably, and sharpening your critical thinking skills—developing abilities, in other words, that will make a difference in your life long after specific content details have faded from memory.

This course satisfies a requirement for Warren College. It is in-person only, with no synchronous remote option unless the pandemic necessitates our doing otherwise.

Contact Information, etc.

Professor Mara Harrell

Office: RWAC-Bldg 1, A&H, 4th floor, #0464

Learning Objectives

By the end of this course, you will be able to:

- Distinguish between moral claims and descriptive claims
- Distinguish between moral arguments and descriptive arguments
- Recognize moral arguments
- Represent the structure of moral arguments
- Evaluate moral arguments
- Create moral arguments

Texts

The required textbook for this course is *Doing Practical Ethics* by Stoner and Swartwood, which is available from the bookstore, and also on Amazon. All other texts, like philosophical articles, will be available on the Canvas site for this course.

Assignments & Grading

There will be three types of assignments in this class: reading quizzes, regular homework assignments, and longer writing assignments. The reading quizzes will be delivered through and graded automatically on Canvas, while the other assignments will be submitted

through Canvas and graded by your TAs. The assignments in this course will not be graded in the traditional fashion. Instead, they will all be graded on a “satisfactory/unsatisfactory” basis. The system is called “**specifications grading**.” An assignment is “satisfactory” if it has met all the specifications for that assignment. The specifications for each assignment will be described in more detail in the Assignments folder on the Canvas site for this course.

Your final grade in this course will then be determined by how many of the assignments you have completed satisfactorily (see below). This means that you can choose what grade you would like to earn in this course and aim toward that grade as it will depend on the successful completion of various assignments. There will be rubrics available so you can see how each assignment is graded.

What counts as “satisfactory” for each assignment?

Quizzes: Answering at least 80% of the questions correctly on a quiz earns a grade of “satisfactory.”

Homework: Answering at least 80% of the questions correctly on a homework assignment earns a grade of “satisfactory.” The criterion for a correct answer to a homework problem will be explained in the instructions.

Longer Writing Assignments: A list of several specifications that the assignment must meet will be given in the instructions for each assignment. Earning a grade of “satisfactory” means that the assignment has met *all* of the specifications.

What happens if what I turn in isn’t deemed “satisfactory”?

The point of having a grading system like this is to make the student’s final grade in the course actually indicate the level of mastery of the material the student achieved. In traditional points-based grading, a student can consistently produce sub-standard work and still pass the class, in which case the passing grade does not reflect the fact that the student may not have actually mastered *any* of the material at all.

So, what to do? The answer is to give the students ways not only to master the content, but also to demonstrate that mastery. So, for any assignment that is deemed unsatisfactory, the student can **revise and resubmit** it within 2 weeks of the original due date. On the other hand, the student should have incentives to turn in their best work on the first try. So, the number of opportunities the student has to revise and resubmit is limited. And this leads to tokens:

TOKENS: Each student will begin the quarter with 4 tokens. You may use one or more of them throughout the quarter. A token will allow you to either (1) **resubmit** an assignment (one or more times) or (2) receive **an extension** on an assignment (only one per assignment, and only as long as the extension is arranged with the TA before the assignment’s deadline).

How do I revise and resubmit an assignment?

Revising and resubmitting an assignment requires (1) revising the assignment based on the feedback given by the TA and (2) a reflection (a short description of how you used the formative feedback you received to improve your revision).

So, what do I have to do to get an A (or B or C) in this class?

As stated above, the grade you earn depends on the number of quizzes and assignments you complete satisfactorily.

There are four modules in this course:

1. Introduction to Moral Argumentation
2. Moral Arguments from Principle
3. Moral Arguments from Analogy
4. Moral Inference to the Best Explanation Arguments

You will earn an A for satisfactorily completing the syllabus quiz *and* 4 modules, a B for 3, a C for 2, a D for 1, and an F for 0.

Can I only get A, B, C, D, or F? No pluses or minuses?

Actually, you can earn a + attached to your base grade if you attend *and* actively participate in **all** your weekly discussion sections, in addition to satisfactorily completed the required modules.

To earn a final grade of:	You must satisfactorily complete:
A+	all 4 modules <i>and</i> the syllabus quiz <i>and</i> 100% discussion section attendance
A	all 4 modules <i>and</i> the syllabus quiz
B+	3 of the modules <i>and</i> the syllabus quiz <i>and</i> 100% discussion section attendance
B	3 of the modules <i>and</i> the syllabus quiz
C+	2 of the modules <i>and</i> the syllabus quiz <i>and</i> 100% discussion section attendance
C	2 of the modules <i>and</i> the syllabus quiz
D	1 of the modules <i>and</i> the syllabus quiz
F	0 modules <i>and/or</i> an “unsatisfactory” on the syllabus quiz

Note: An A and an A+ are both a 4.0 in your GPA calculation

How do I satisfactorily complete a module?

Each module includes reading quizzes and homework assignments; and modules 2-4 also include a longer writing assignment. Completing a module satisfactorily consists in (1) earning a “satisfactory” on all the quizzes and homework and (2) earning a “satisfactory” on the longer writing assignment (for modules 2-4).

Please note that although Canvas will display the grades that you have earned on each assignment, the score in the “Total” column in the gradebook does **not** correspond to your grade the class.

Attendance

Attendance in Lectures and Discussion Sections is not required. That being said, there are many reasons to come to the lectures and sections. First, the text and articles we are using in were not written by me. In lecture and discussion, we (the TAs and I) will explain things a little bit differently, so the best option is to use the text *and* come to class. Going through the same ideas more than once is good, especially if they are from different perspectives. Additionally, you can't have your questions answered while you are reading the text. In lecture, you can have your questions answered in real time, and I can offer several alternative explanations if one isn't sufficient. And finally, both the verbal and non-verbal feedback I get from students in class helps me determine whether I am going too fast, or students are confused. The same is true for the discussion sections where you will get still another point of view.

General Information**Waitlist**

Students will be admitted to this class according to their place on the waitlist.

Student Walk-in Hours

If you cannot make it to the scheduled walk-in hours, please contact me to make an appointment. Also, whenever I am in my office with the door open, you are welcome to stop in.

I encourage you to use the student walk-in hours as an opportunity to clarify points you don't understand, to get additional readings, to talk about the subject matter in relation to your own interests, to go over work in progress, or to address problems you may be having in the course.

Visit early and often. Email is the most reliable way to contact me.

Email

I am happy to reply to emails sent from UCSD email addresses. Replies can be expected within 24-48 hours. In order to ensure that I do not miss your email, you should put “Phil 27” and which section you are enrolled in (A01, A02, etc.) in the subject line.

Please note that I do not reply to emails from non-UCSD addresses, and there are two subjects I do not discuss by email, even if they are sent from a UCSD account. These are:

- a) Requests for information about an exam or other assignment due during exam week that arrive in the 24-hour period immediately preceding the exam or assignment deadline.
- b) Requests to adjust your final class grade. If you have an issue with your grade, please make an appointment to discuss it during my student walk-in hours next quarter.

Help with Assignments

In addition to Professor Harrell and the TAs for this course, there are services on campus to help students with coursework.

Office of Academic Support & Instructional Services (OASIS): OASIS offers free, one-on-one tutoring for students (<http://oasis.ucsd.edu>). Tutoring services are designed to guide students to the point at which they become independent learners, no longer needing a tutor.

Teaching + Learning Commons: The Teaching + Learning Commons offers a range of services that will benefit you in this class and others. Their free services include one-on-one and group consultations for written assignments and oral presentations, content tutoring, or understanding various learning strategies. You can drop by in person on the lower level of Geisel Library or make an appointment online at <http://commons.ucsd.edu>.

Policies

Late Assignments and Requests for Extensions

Late assignments will be marked “unsatisfactory” unless a request for an extension has been arranged ahead of the deadline. Requests for extensions will be denied after the deadline for the assignment has passed. Requests for extensions will only be granted with the use of a token.

Cell Phones, Laptops, and Other Related Technologies

How students interact with portable technology devices can very much harm the dynamics of the classroom. Studies have shown that it is not only students that use these devices who suffer, but also the students around them. Therefore, I expect you to **turn off your cell phone** before coming to class. There is to be no text messaging, checking email or otherwise “playing” with electronics during class.

Religious Observance

If you have a conflict between a religious holiday and a graded assignment, please contact one of us in advance so that we can make appropriate arrangements.

Accommodation for Disability

Students requesting accommodations for this course due to a disability must provide a current Authorization for Accommodation (AFA) letter issued by the Office for Students with Disabilities (OSD) which is in University Center 202 behind Center Hall. Students are required to present their AFA letters to Faculty (please arrange to contact me privately) and to the OSD Liaison in the department in advance so that accommodations may be arranged. Contact the OSD for further information: 858.534.4382 (phone), osd@ucsd.edu (email), disabilities.ucsd.edu (web)

Academic Integrity

Integrity of scholarship is essential for an academic community. The University expects that both faculty and students will honor this principle and in so doing protect the validity of University intellectual work. For students, this means that all academic work will be done by the individual to whom it is assigned, without unauthorized aid of any kind. More information about UCSD’s policy on academic integrity is available at <http://senate.ucsd.edu/Operating-Procedures/Senate-Manual/appendices/2>

Health and Well-being

Take care of yourself. Do your best to maintain a healthy lifestyle this quarter by eating well, exercising, avoiding drugs and alcohol, getting enough sleep, and taking some time to relax. This will help you achieve your goals and cope with stress.

All of us benefit from support during times of struggle. There are many helpful resources available on campus and an important part of the college experience is learning how to ask for help. Asking for support sooner rather than later is almost always helpful.

If you or anyone you know experiences any academic stress, difficult life events, or feelings like anxiety or depression, we strongly encourage you to seek support. If there are issues related to coursework that are a source of particular stress or challenge, please speak with me, so that I am able to support you. UC San Diego provides several resources to all enrolled students, including:

Counseling and Psychological Services (858-534-3755 | caps.ucsd.edu)

Student Health Services (858-534-3300 | studenthealth.ucsd.edu)

CARE at the Sexual Assault Resource Center (858-534-5793 | care.ucsd.edu)

The Hub Basic Needs Center (858-246-2632 | basicneeds.ucsd.edu)
