Description
In this class, we will study the intersecting developments of philosophy and science in the seventeenth century from a variety of perspectives. We will examine how modern science emerges in reaction to Aristotle's theory of nature, the dominant account of the universe for the previous two millennia. We will consider how philosophical issues—concerning space, matter, motion and force—drive scientific inquiry, and how new philosophical theories of knowledge and human nature track the progress of science. And we will investigate the relation of the new science to traditional, Biblical religion, noting the points at which the two come into conflict and the efforts made by scientists and philosophers to reconcile their theories with religious doctrines. Our world takes shape in the seventeenth century and is significantly defined by the rise of modern science. We will use the lens of philosophy to examine that development and its continuing importance for our understanding of ourselves and the world around us.

Required Text

All other readings for the class will be made available via the class TED site.

Assignments and Grading (total 100 points)

• Two take-home midterms, each worth 30 points (the first midterm will be distributed on January 26 and will be due at 11:59 pm on February 1; the second exam will be distributed on February 23 and will be due at 11:59 pm on March 1). All exams will be submitted on TED via turnitin.com.

• Weekly, unannounced reading quizzes. Each will be worth 2 points. You may count your best 5 quizzes for a total of 10 points.

• Final examination, worth 30 points; cumulative but concentrating on material from the latter part of the course.

• Both midterms and the final examination must be taken to pass the class. No makeup quizzes or exams will be given.

Other Important Information

• Regular attendance and completion of the required reading ahead of lectures are critical. Engagement with the course presupposes that you have done the assigned reading and are prepared to discuss it in class.

• Use of computers and other electronic devices is allowed in class for legitimate pedagogical purposes, not for web surfing or personal communications. When I use slides, I will make
them available after class, so there is no reason to try to write down everything on them. In
general, you should remain as focused on the content of the lecture as possible.

• If accommodations are needed for a disability or for religious reasons, please discuss the matter
  with me as soon as possible.

• Extensions will only be given to those who present evidence of a valid excuse in a timely manner.
  Note that computer or printer failure does not usually constitute a valid excuse, so be sure to take
  all necessary precautions to safeguard your work (backup, backup, backup!). If at any time you
  believe you have a legitimate claim to an extension, bring it to my attention as soon as possible
  (e.g., if you are going to be out of town for a legitimate purpose, such as a university-sponsored
  concert performance, athletic event, conference, or the equivalent). Unexcused late exams will be
  penalized the equivalent of one +/- letter grade per day.

• Students should familiarize themselves with the UCSD Policy on Integrity of Scholarship:
  http://students.ucsd.edu/academics/academic-integrity/policy.html. There is a zero-tolerance
  policy on plagiarism in this class. If you are pressed for time or blocked, it is always better to talk
  with me and to take the late penalty if necessary, than to submit work that is not your own. All
  written work will be submitted to turnitin.com, so there is a very high probability that plagiarism will
  be detected. Anyone who is found to plagiarize work will receive an automatic F for the course.
  Additional disciplinary penalties may be assigned by the UCSD administration. Receipt of this
  syllabus constitutes an acknowledgement that you are responsible for understanding and acting
  in accordance with UCSD guidelines on academic integrity.

Schedule of Classes and Reading Assignments

UNIT 1 THE SCIENTIFIC REVOLUTION: FROM ARISTOTLE TO GALILEO

WEEK 1
January 5  Introduction

January 7  Aristotelian Physics
Reading: Aristotle, excerpts from Physics (Matthews, 7-26)

January 9  Scientific Explanation
Reading: Aristotle, excerpts from Posterior Analytics (Matthews, 26-32)

Week 2
January 12 The Heliocentric System
Reading: Nicholas Copernicus, excerpts from Commentariolus (1512) and On the
  Revolution of the Heavenly Spheres (1543) (Matthews, 36-44)

January 14 The Scientific Mind
Reading: Francis Bacon, New Organon (1620), Part 1, secs. 1-65 (TED)

January 16 Scientific Methods
Reading: Bacon, New Organon, Part 1, sec. 95-130 (TED)

Week 3
January 19 MLK DAY – No Class

January 21 Galileo’s Challenge to the Catholic Church
Reading: Galileo Galilei, excerpts from The Sidereal Messenger (1610) (TED)

<tr>
<td>February 23</td>
<td>The Invention of Modern Physics</td>
<td>Isaac Newton, Preface to the <em>Principia</em> (1687) (Matthews, 137-9)</td>
</tr>
</tbody>
</table>
Definitions and Laws (TED)

February 25  Space, Time and Force
   Reading: Newton, *Principia*, Scholium (Matthews, 139-46); Part III, “Rules for Reasoning” (Matthews, 146-8)

February 27  Gravity and the Argument from Design
   Reading: Newton, *Principia* (2nd edition), General Scholium (Matthews, 148-53); *Optiks* (1717), Query 31 (Matthews, 153-8)

UNIT 3  A SCIENCE OF HUMAN NATURE

Week 9
March 2  Mind-Body Dualism
   Reading: Descartes, *Discourse on the Method* (1637), Parts 4-5 (TED)

March 4  Naturalizing Human Beings
   Reading: David Hume, Introduction to *A Treatise of Human Nature* (1739); *An Enquiry concerning Human Understanding* (1748), sec. 4 (TED)

March 6  Induction and Causal Reasoning
   Reading: *An Enquiry concerning Human Understanding*, sec. 5 (TED)

Week 10
March 9  Liberty and Necessity
   Reading: Hume, *An Enquiry concerning Human Understanding*, sec. 8 (TED)

March 11  Animal Reason
   Reading: Hume, *Enquiry concerning Human Understanding*, sec. 9 (TED)

March 13  Summing Up

Monday, March 16  FINAL EXAM, 11:30 am-2:30 pm
